

STANZABAB

with Indonesia

The MLM project is a continuously appealing project that emerges worldwide, including in Asia, Europe, and North America. Many MLM projects start with confidence, but none have shown sustainability and ultimately fade into obscurity.

The critical failure of these projects is one: blind fundraising without an established business model. MLM projects typically see the funds raised being inversely spent over time, yet no project considers financial factors as they proceed with a business without a clear business model (or on the premise of "what business will be conducted in the future").

As a result, fundraising without business readiness inevitably transforms into a form that will be depleted over time, leaving investors in a position where the return of their investment becomes impossible.

STANZabab aims to initiate an MLM business based on a clear business model. Starting with obtaining the necessary licenses to conduct our business, we have partially completed the development of various platforms, including exchanges, casinos, and NFTs, and the fundamental ecosystem of the project is already fully implemented.

Make in Indonesia

The platforms we will introduce are based in Indonesia, with a primary focus on the Southeast Asian market. The current Indonesian market is similar to China in the 2000s and Korea in the 1990s, meaning Indonesia is on the verge of explosive economic growth, making it an optimal country to start a business.

Especially with the rapidly growing IT environment, the spread of internet accessibility has led to a surge in the distribution rate of cryptocurrency wallets, nearing 29% of the total population. This is the fourth-largest figure in the world, confirming that the domestic market's growth potential is more attractive than any other country.

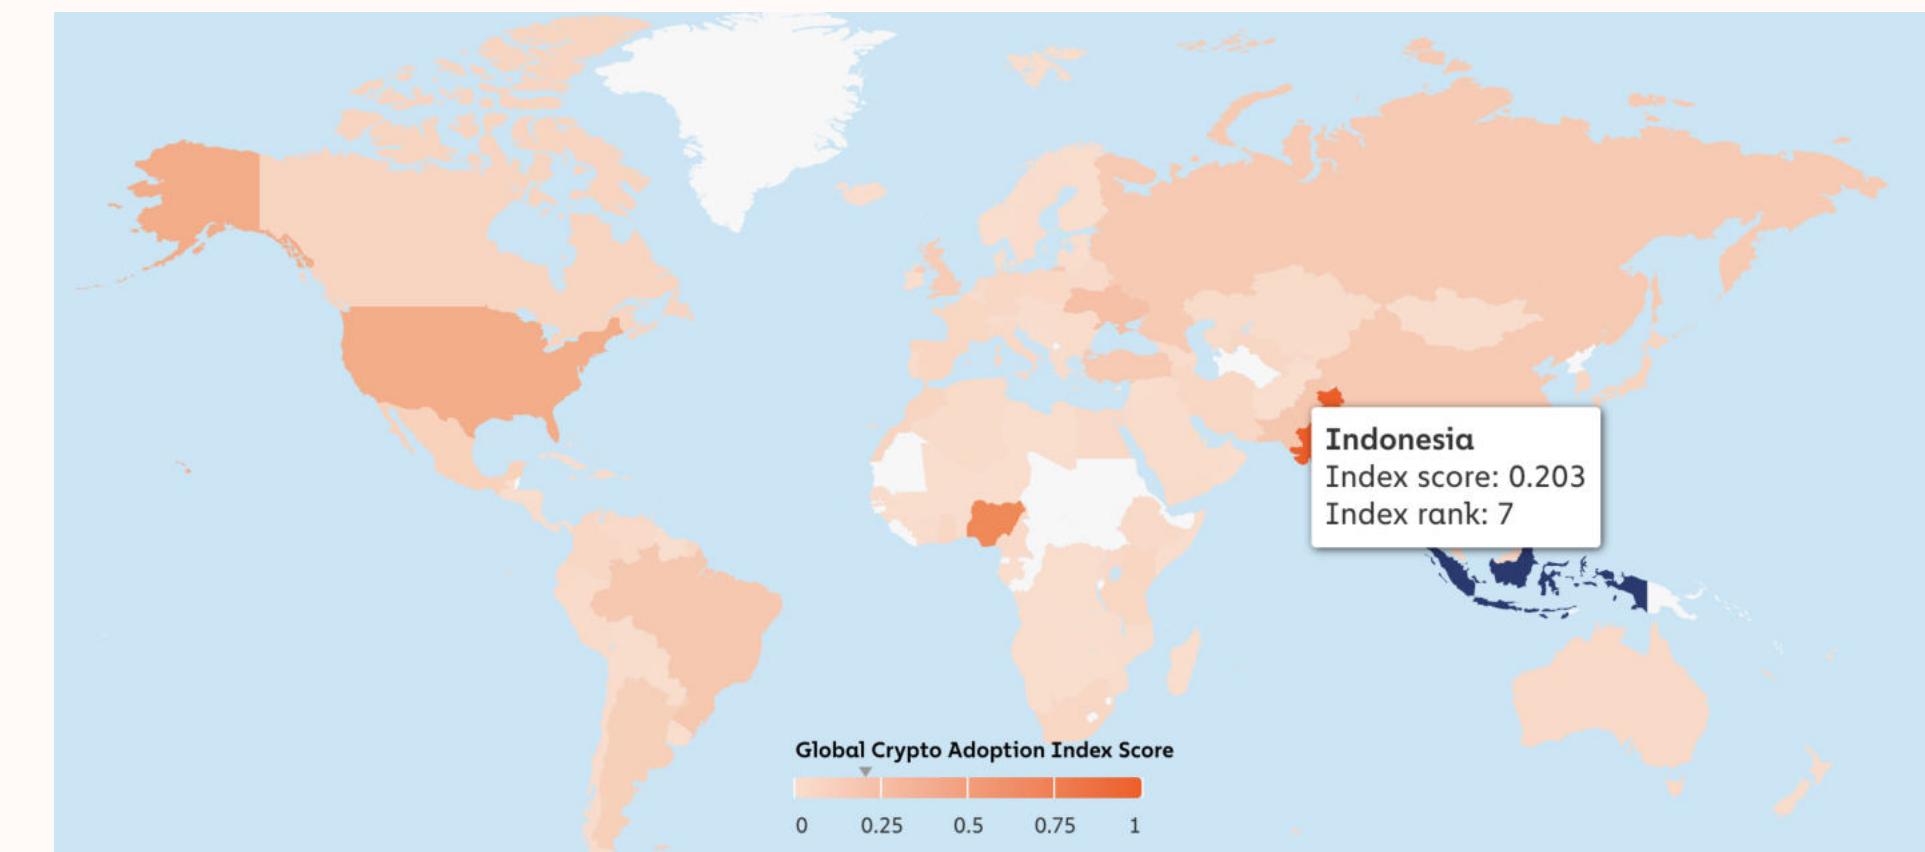

STANZabab is a project ready to be swiftly assimilated into the Indonesian market. The projects we have prepared are designed to be welcomed by the people of Indonesia and Southeast Asian nations and structured to spread rapidly.

Based on our success in Indonesia, we will continue to strive to invigorate the weary and contracted MLM market due to the pandemic and wars, ensuring that STANZabab will expand globally.

Share of respondents who indicated they either owned or used cryptocurrencies in 56 countries and territories worldwide from 2019 to 2023

Company Intro

PT DNA Metaverse Java

Introducing DNA Metaverse Jaya.

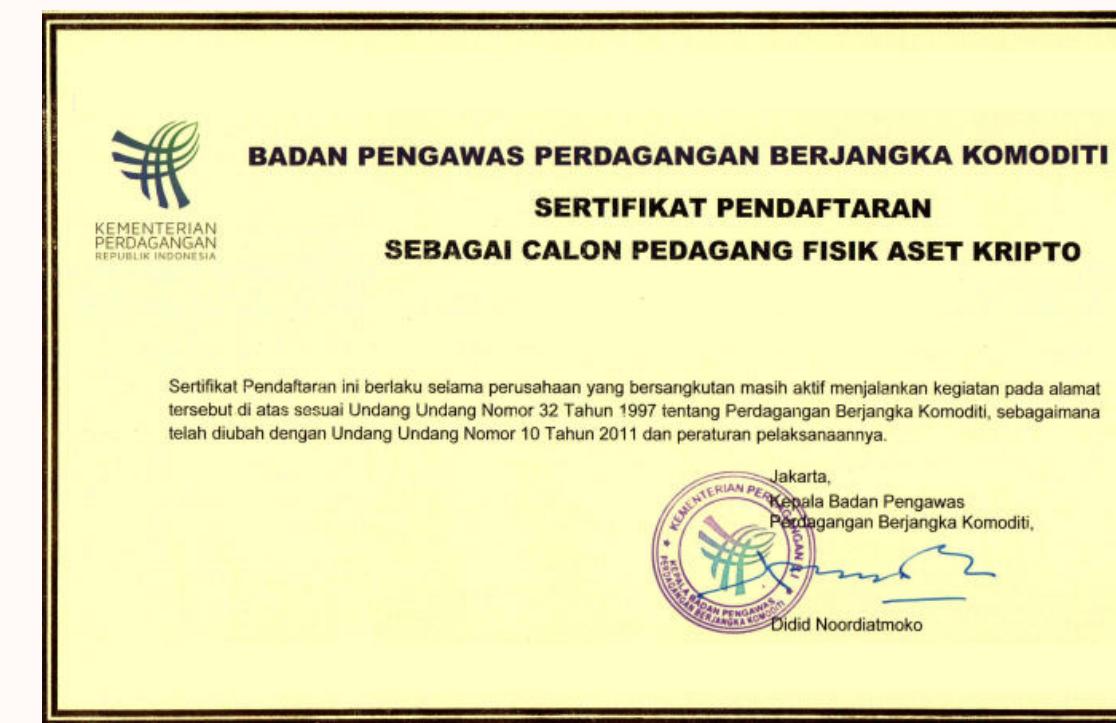

Founded in Indonesia in 2019, our company is composed of over 50 professionals from various fields, standing at the forefront of business innovation.

We hold an RNG (Random Number Generator) license and have been authorized to conduct MLM business by the Indonesian organization AP2LI.

Moreover, we have successfully concluded a usage contract with BAYC NFT and established a strategic partnership with the Indonesian cryptocurrency exchange company Kriptosh. With these licenses, contracts, and local partnerships, DNA Metaverse Jaya has launched STANZabab.

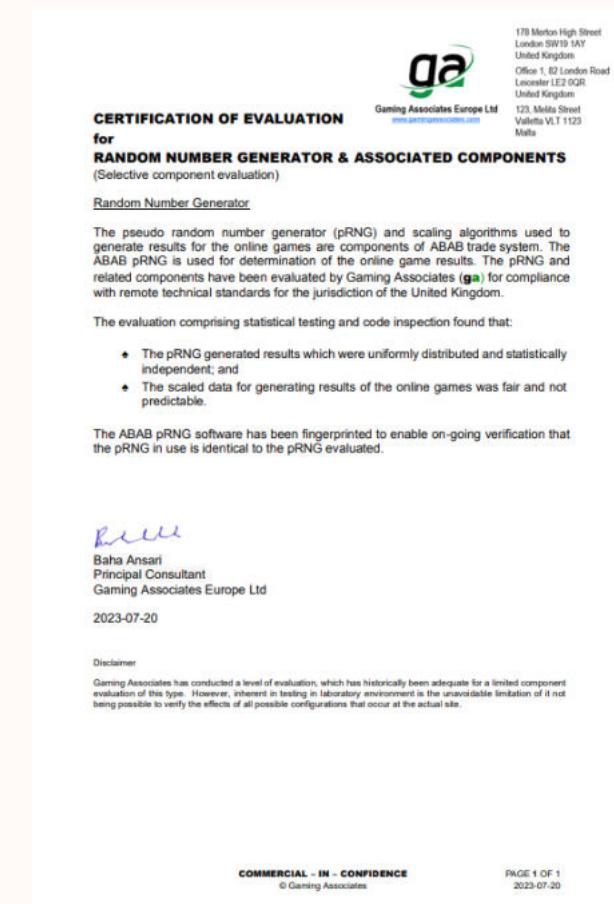

Indonesian Company Registration

Indonesian cryptocurrency exchange license by Bappebti

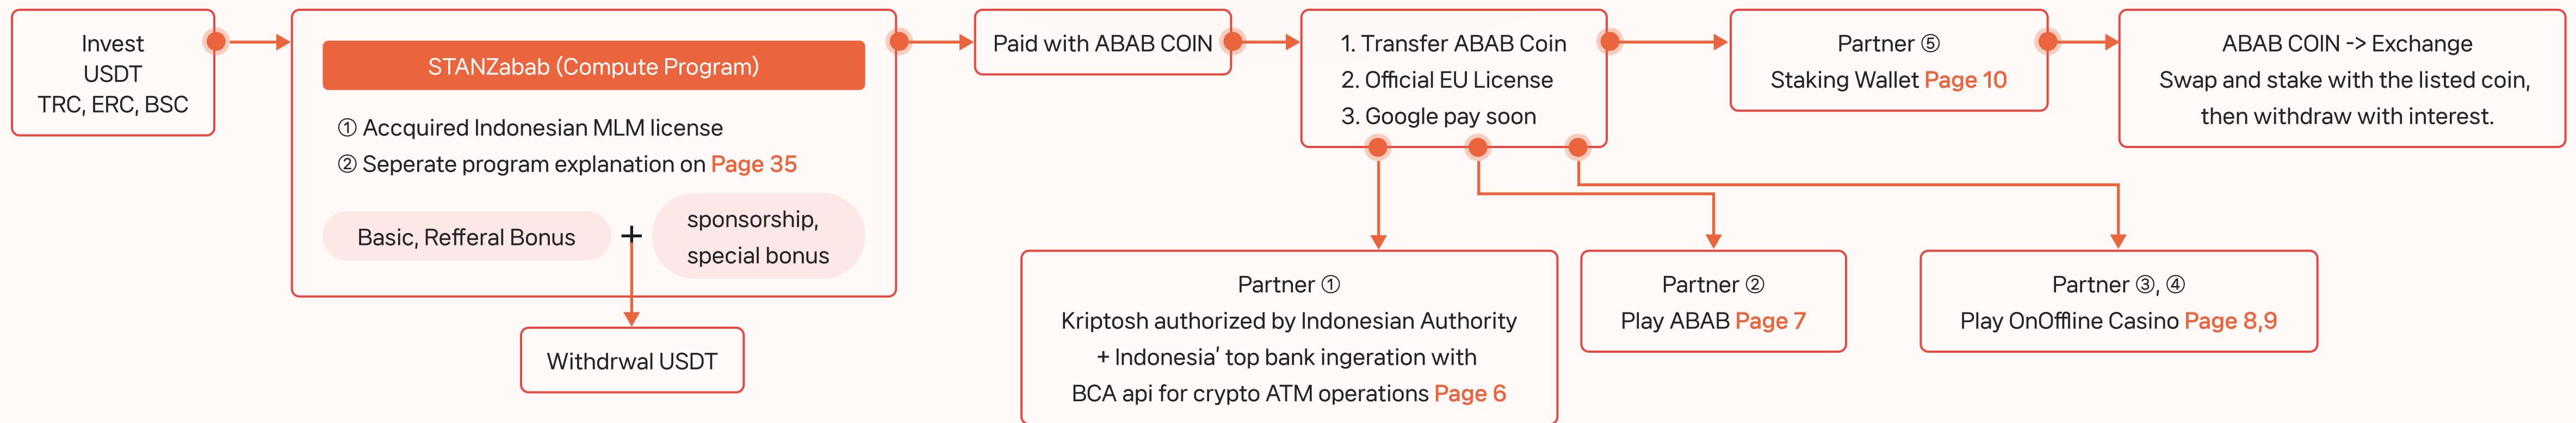

Indonesian MLM license

RNG Certificate to operate platform on EU

Business Structure

STANZabab plans to utilize ABAB Coin, which holds a value equivalent to 1 USDT.

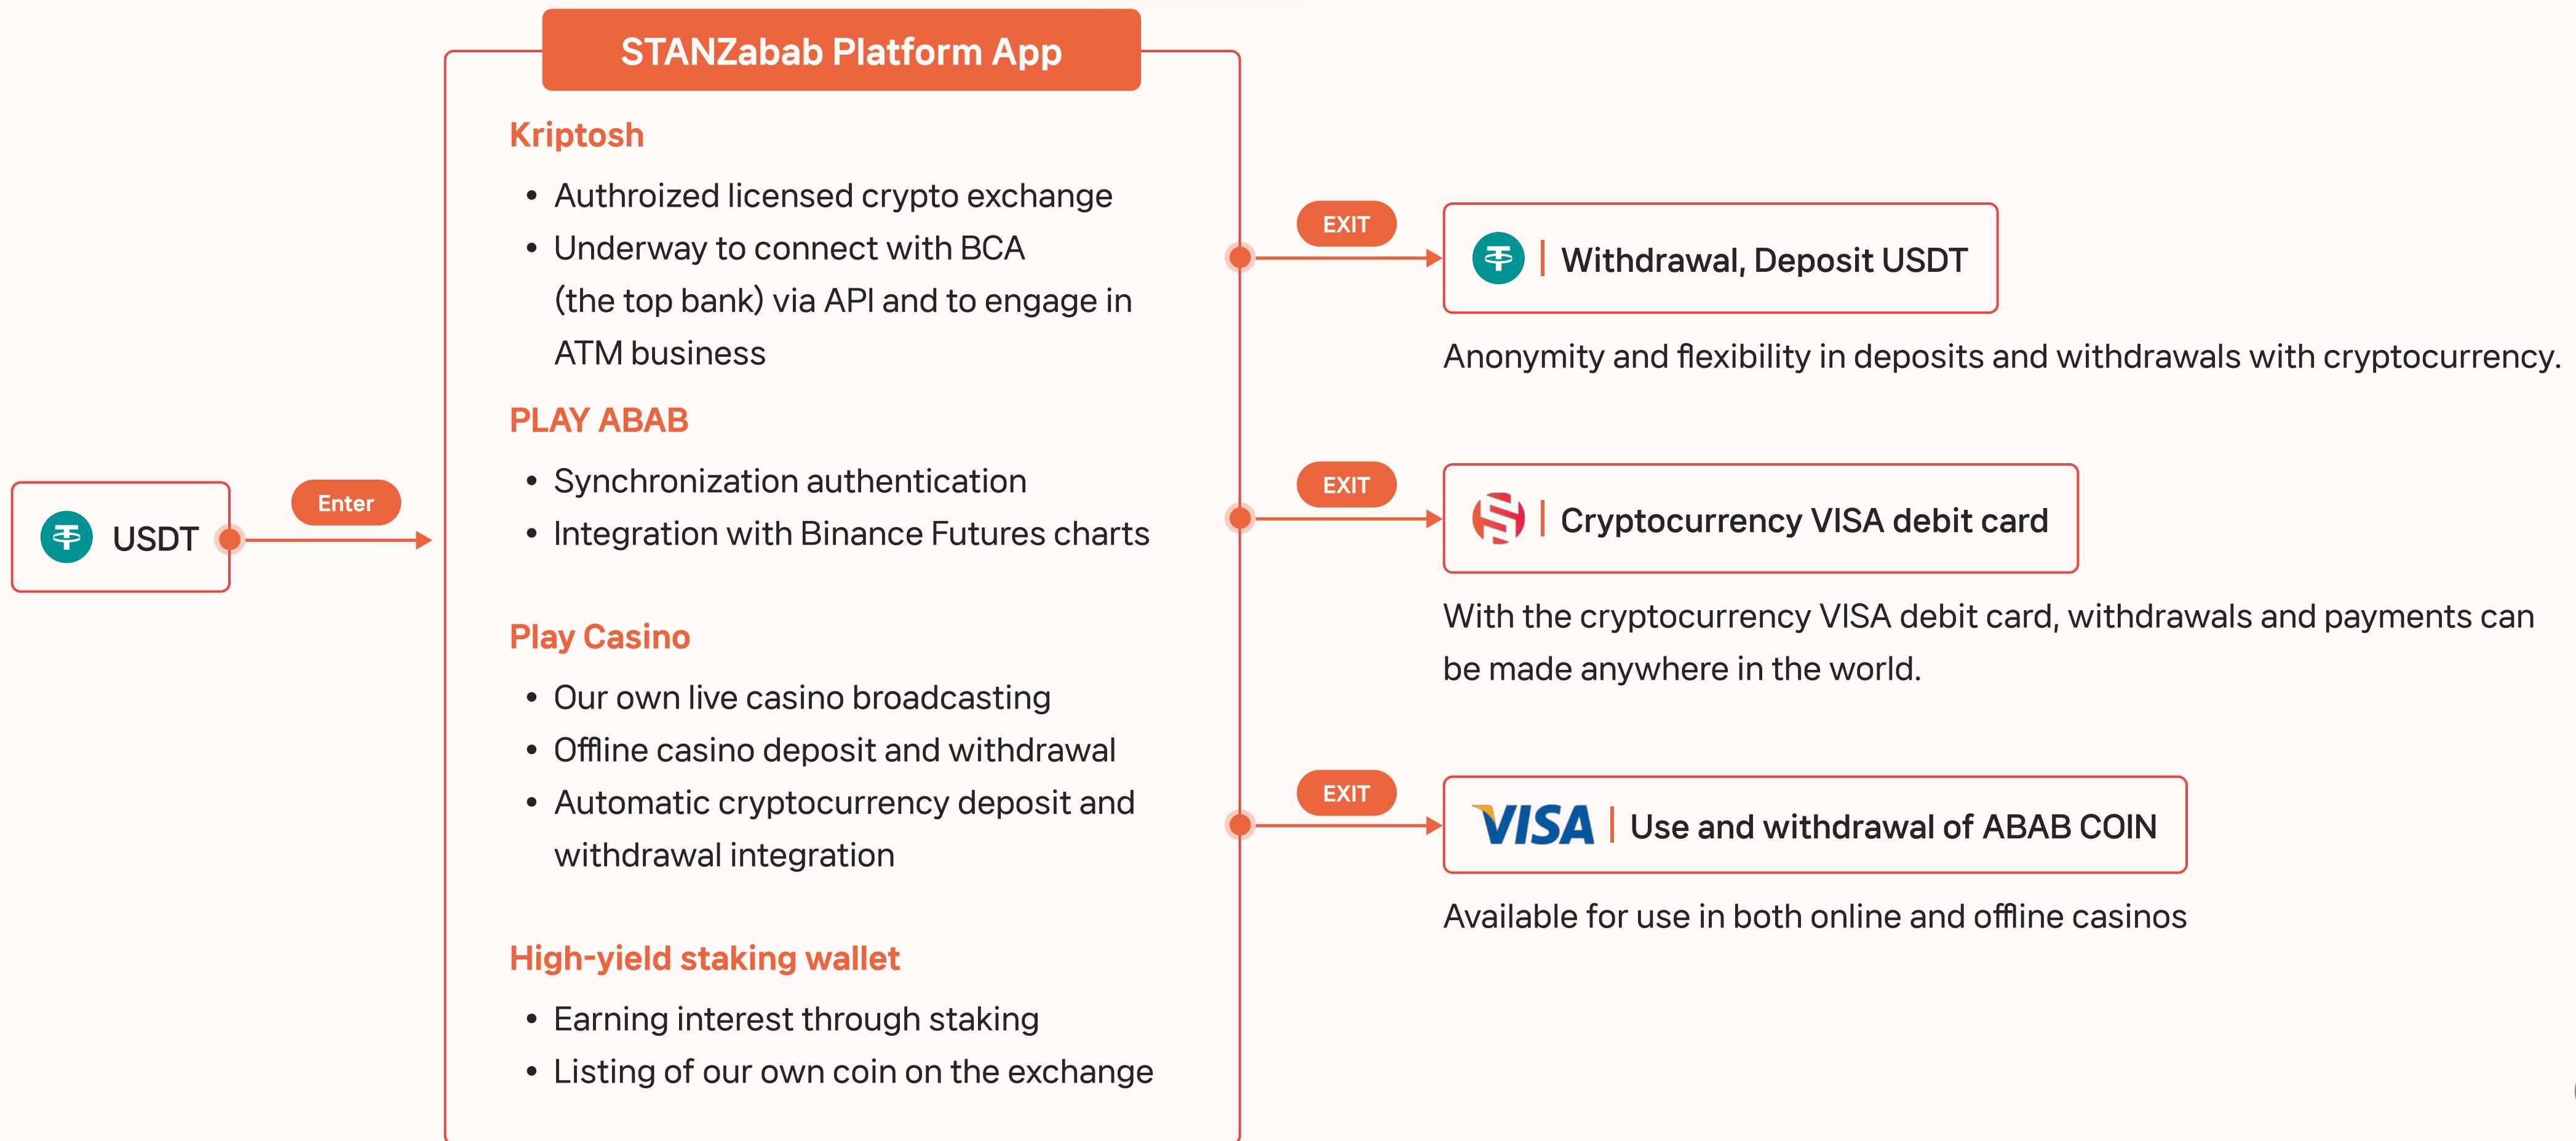

This coin is designed for the distribution of referral commissions and special bonuses and can be used within the STANZabab platform.

Use cases for ABAB COIN: Can be used in various places such as ABAB chart graphic games, ABAB Online Casino, Staking wallet, etc.

The coin, once listed on exchanges, can be liquidated through swaps.

Business Structure

STANZabab is structured as an integrated platform, encompassing business modules of the crypto-casino-financial system, and services extending to payment processing and transfers.

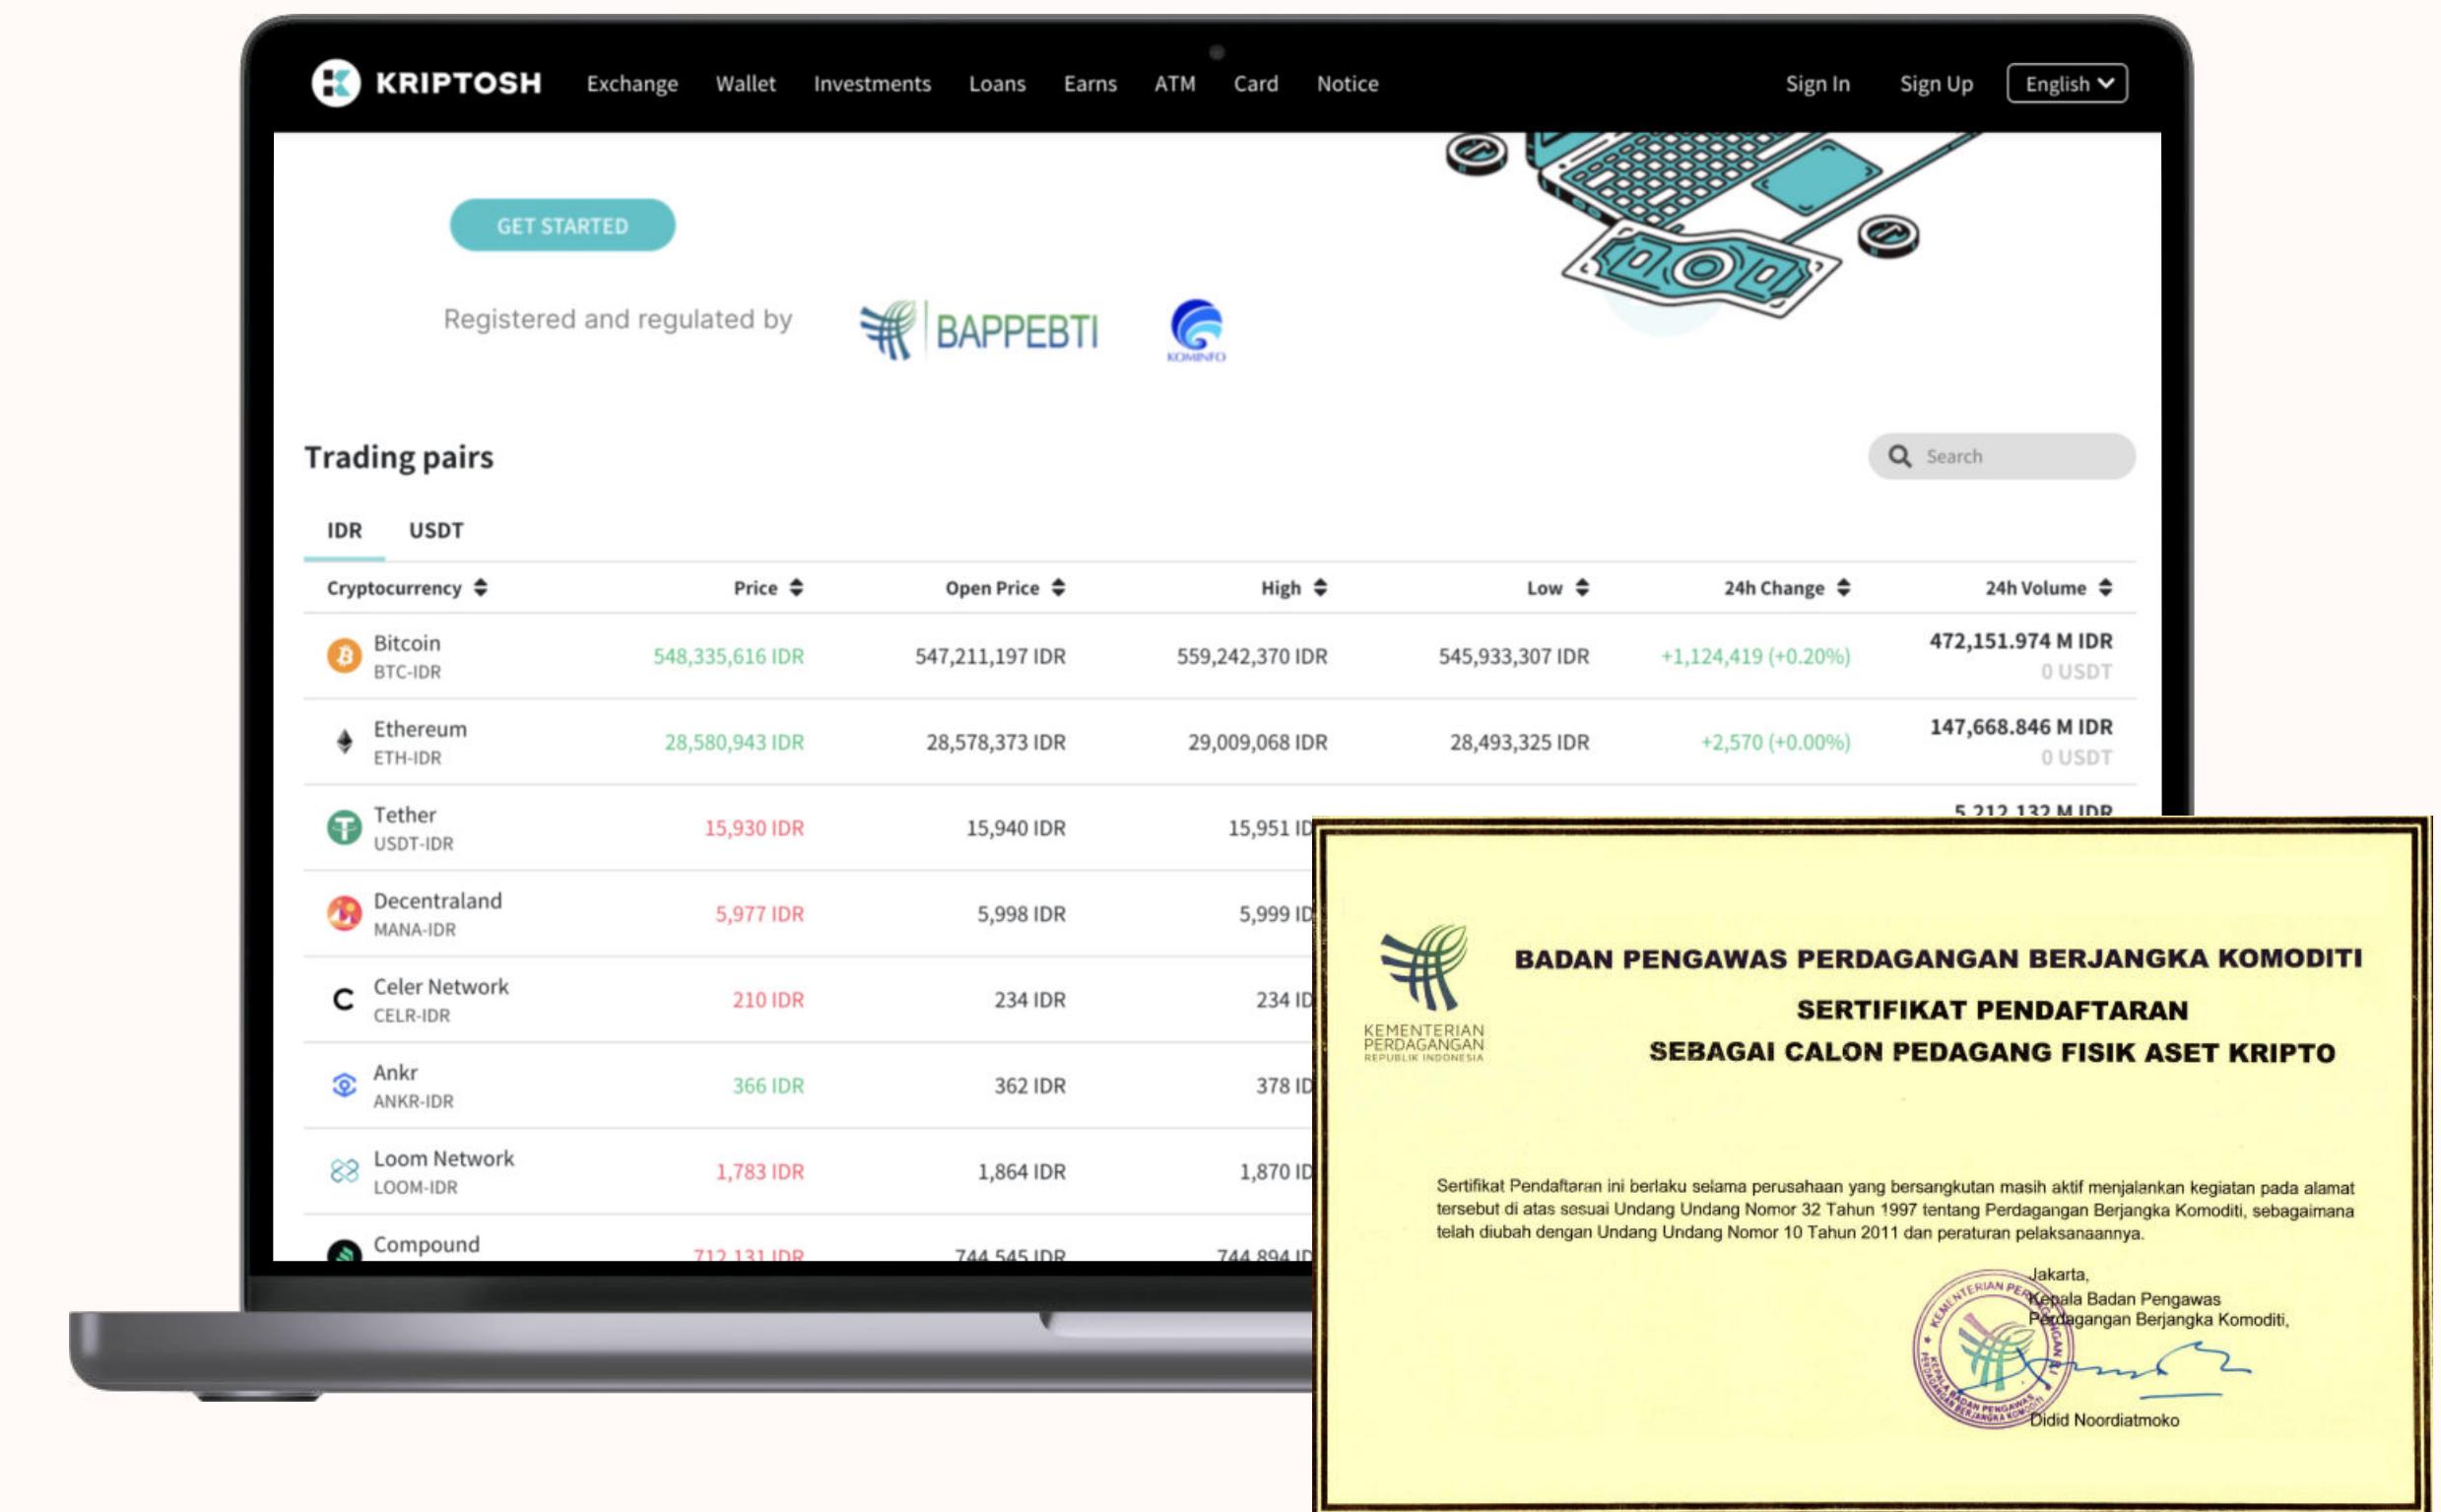

STANZabab Partner 1

STANZabab Major Partner

Kriptosh is an online cryptocurrency exchange based in Indonesia, currently enhancing its development to offer a variety of blockchain services including trading, storage services, and launchpads.

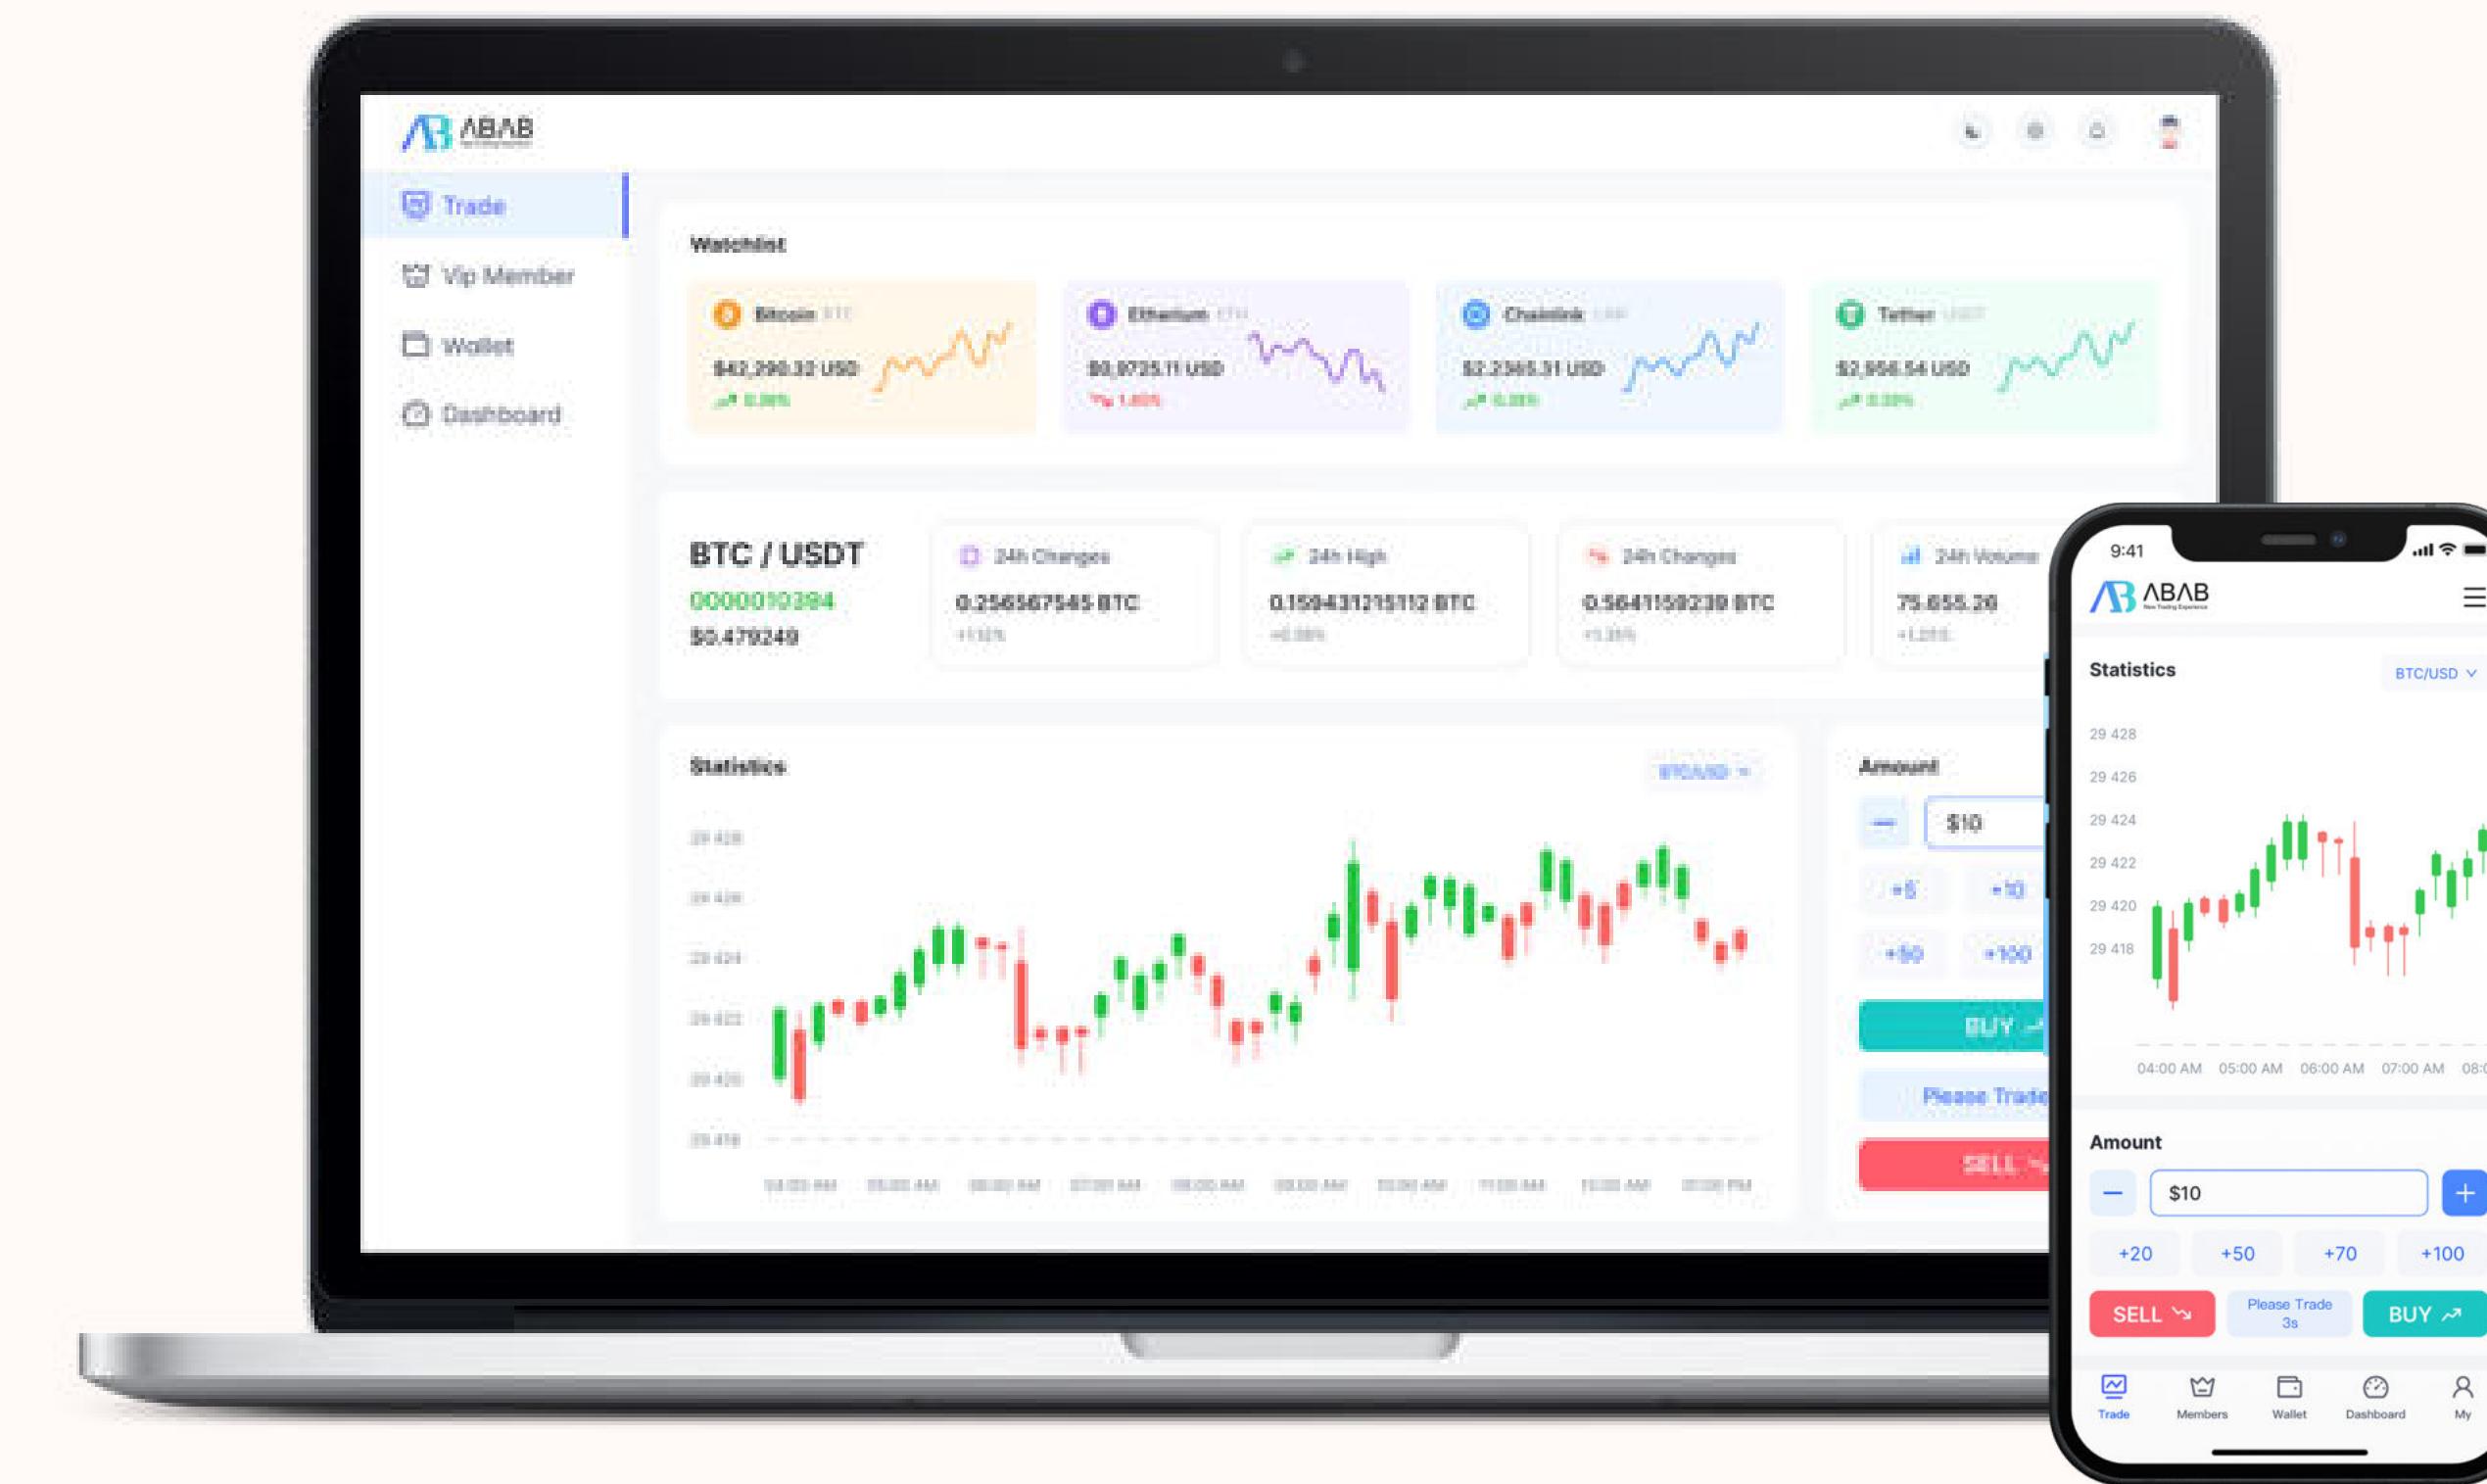

To further strengthen the essential fairness and transparency of a cryptocurrency exchange, Kriptosh has been developed in accordance with international standards, including **ISO 27001 / ISO27017**, and complies with domestic standards by following the guidelines provided by BAPEBBI.

In September 2023, Kriptosh received license approval from **BAPEBBI** and completed its API integration with BCA, Indonesia's leading bank.

STANZabab Partner 2

**ABAB.TRADE - A mini graphic game platform that integrates
Binance charts, ensuring reliability and credibility**

STANZabab Partner 3

Indonesia's first global online casino dedicated to cryptocurrency deposits and withdrawals

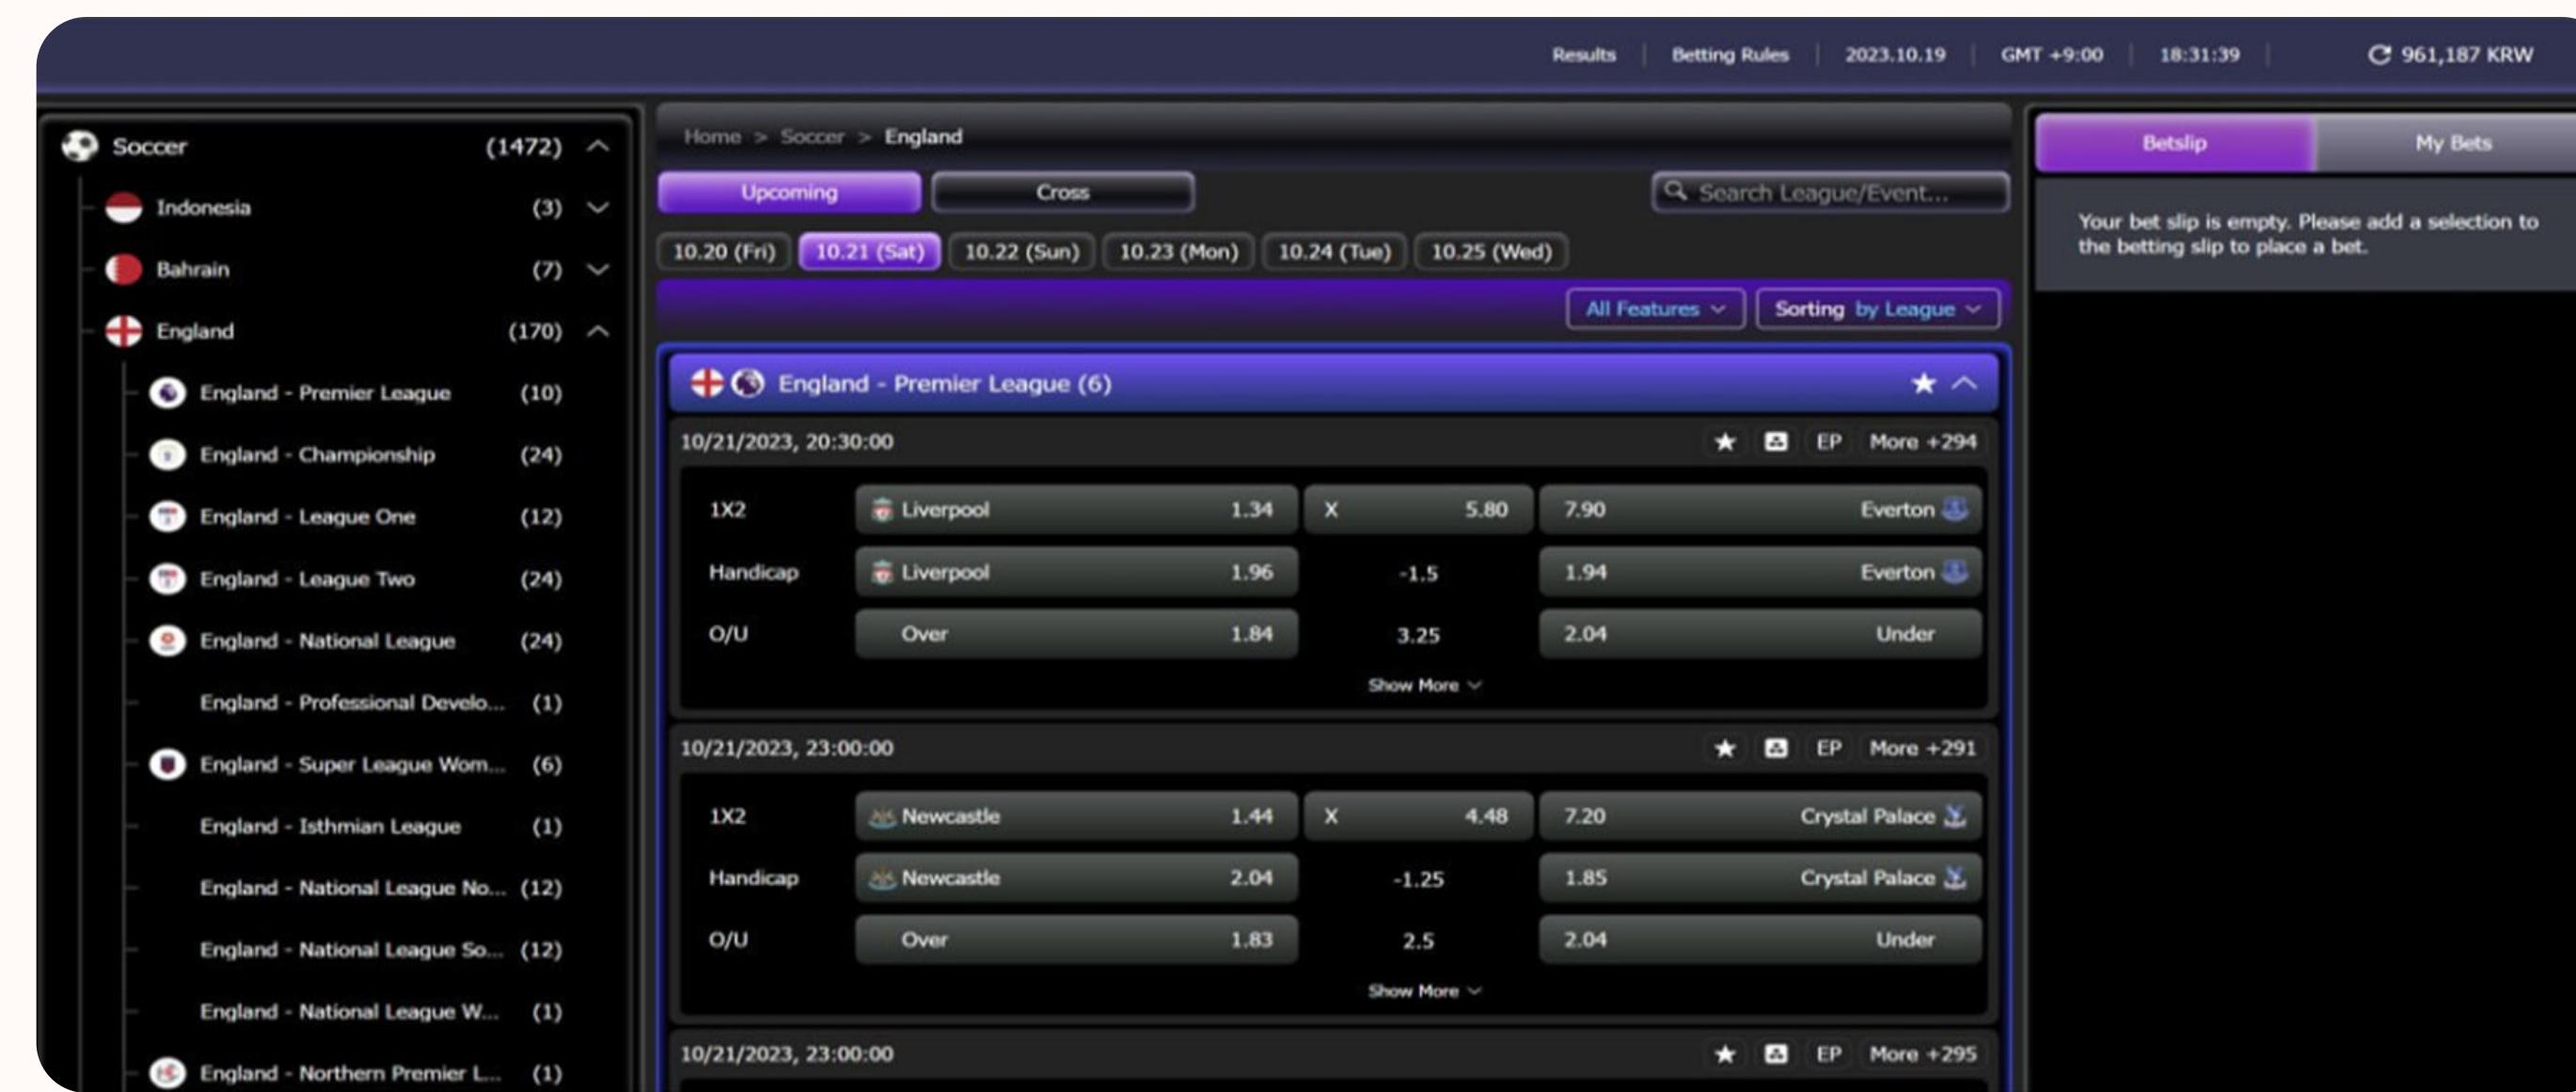

A portal casino integrating top-tier global online casino games, sports betting, hold'em poker, daily lottery, and graphic mini-games from around the world.

STANZabab Partner 4

The world's first online casino service utilizing the BAYC IP

Aggressive online and offline marketing through STANZabab, based on trust and credibility. The lowest price for BAYC NFTs traded on the global exchange Opensea is 5 ETH, approximately equivalent to 9000 USD

STANZabab Partner 5

The Zom B Ape Staking Wallet - a staking wallet integrated with STANZabab

The Zom B Ape Staking Wallet is a wallet that is designed to combine the advantages of both centralized and decentralized wallets, omitting their disadvantages. It is created to incubate coins by continuously hosting good projects, which will contribute to the activation of STABZabab by listing these coins on global exchanges.

STANZabab Milestone I - ATM Business

ATM Business

Conventional ATM machines are plentiful, with approximately 100,000 units in Indonesia and around 300,000 units installed across Southeast Asia by Indonesian banks. Despite being a government-endorsed initiative, not a single Crypto ATM service exists in the region.

32,810

Crypto ATMs are installed worldwide.

70

Crypto ATMs are operational in a total of 70 countries, with 44 suppliers providing the units.

5~12%

Crypto ATMs are operational across 70 countries, with 44 providers in existence.

ATM Business

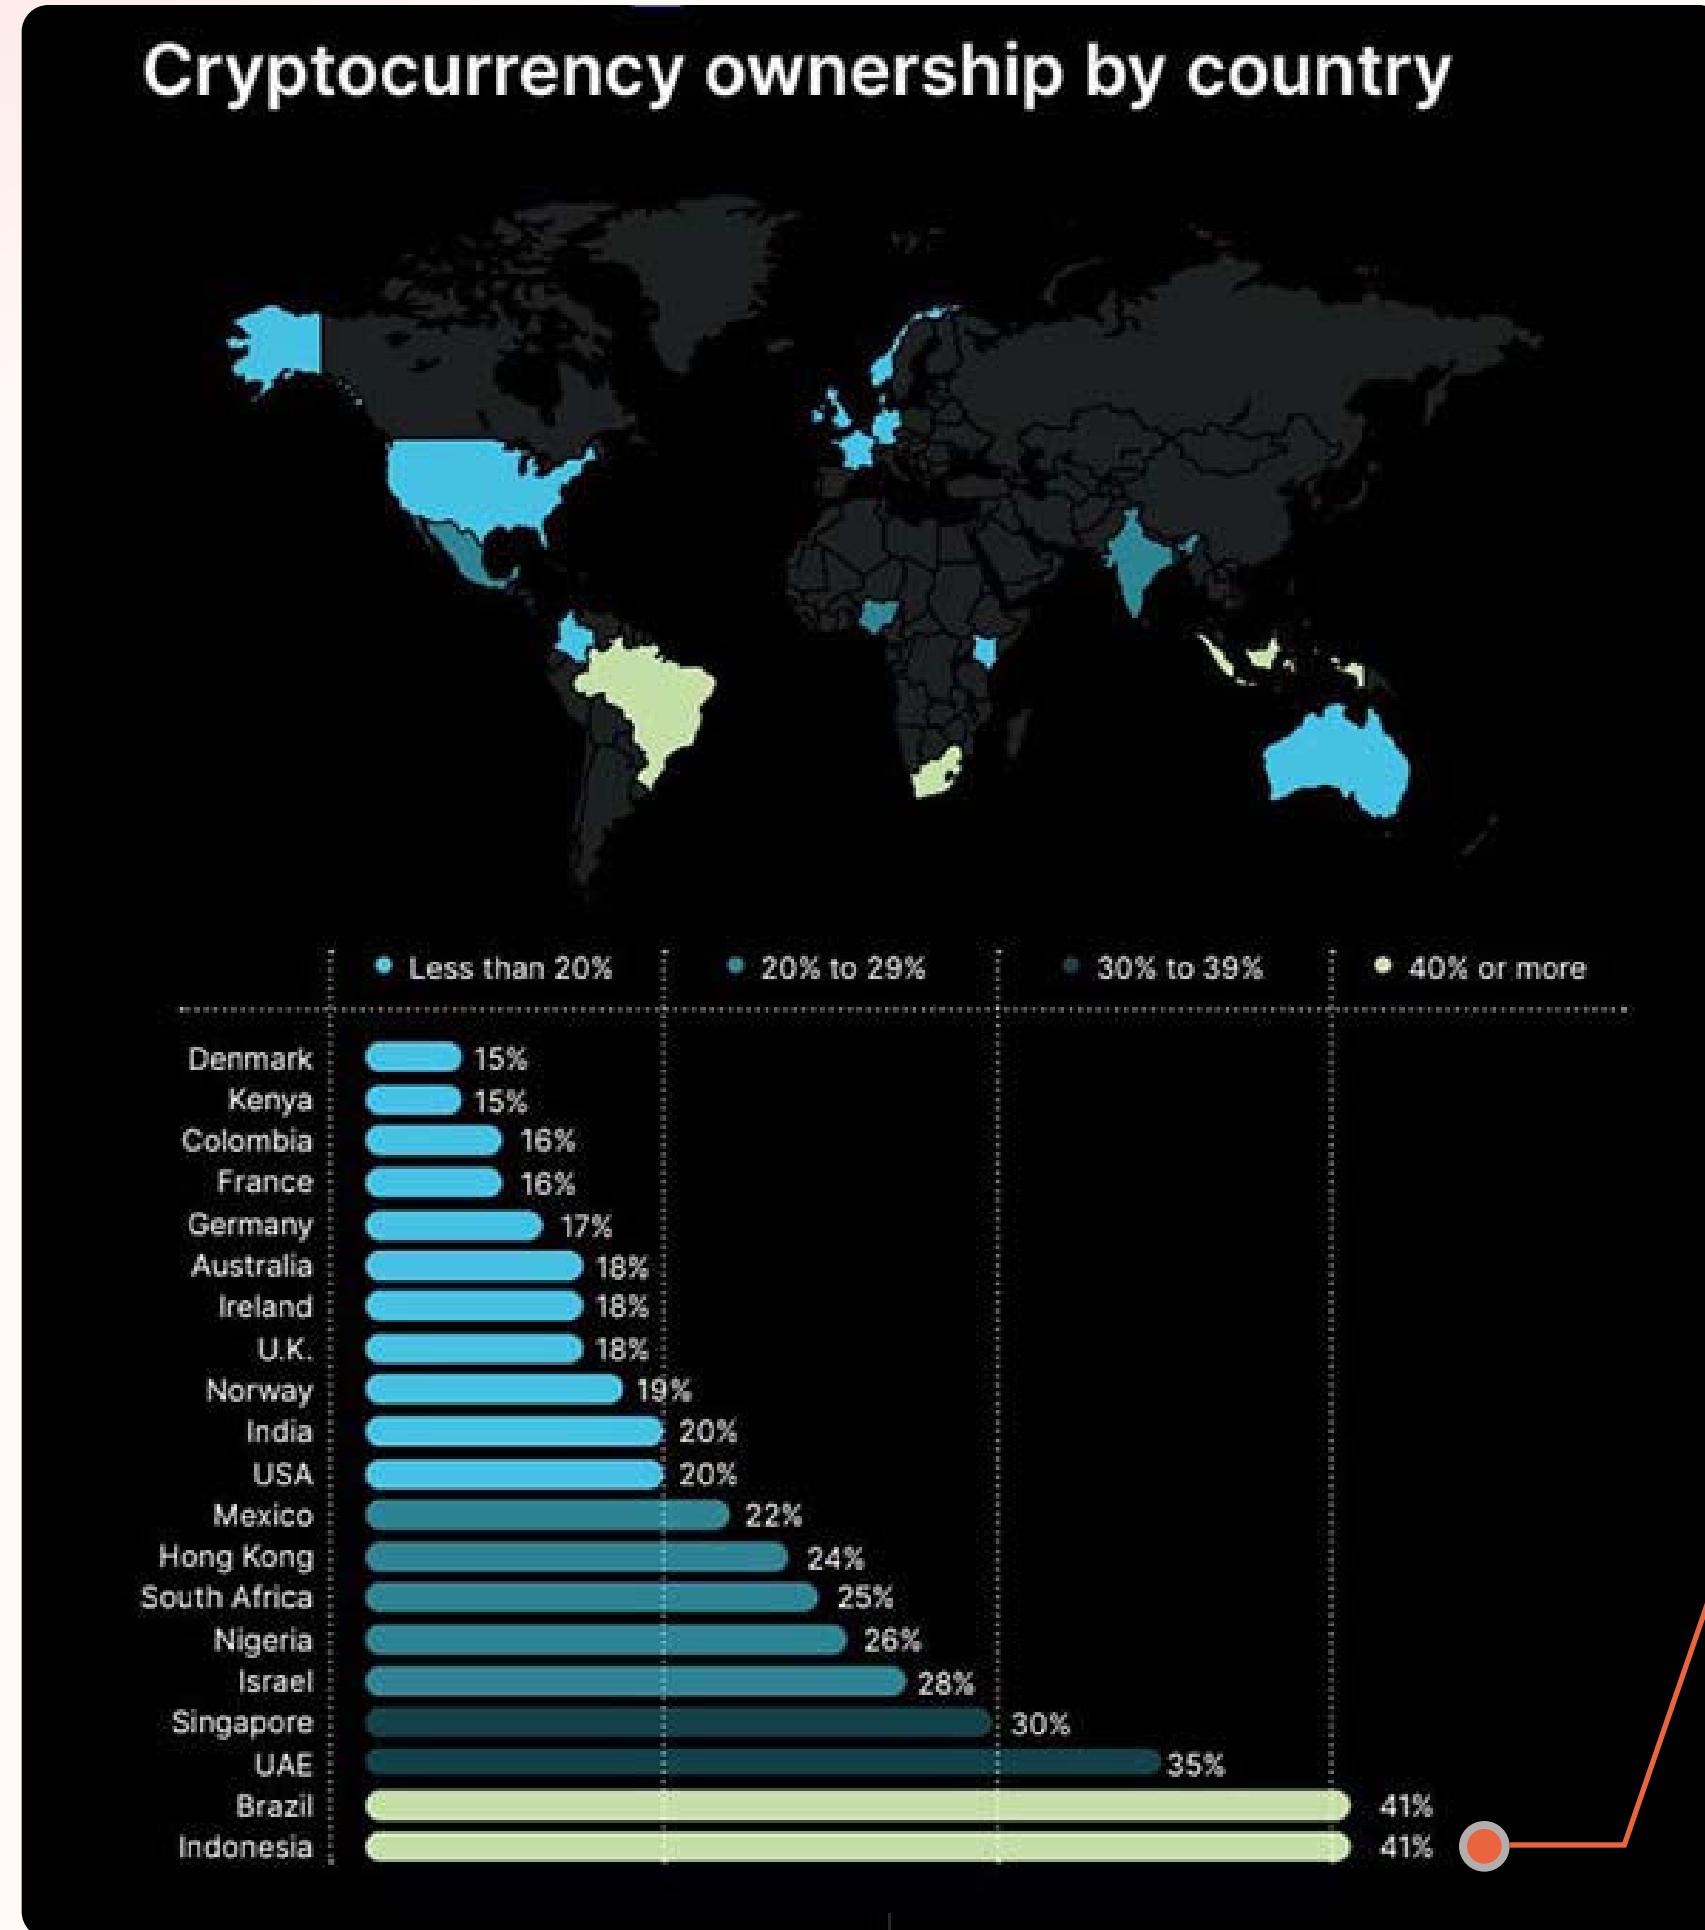

Nasdaq Listing Case: Bitcoin Depot

Excerpt from an article:

Cryptocurrency ATM specialist Bitcoin Depot is expected to be listed on the US Nasdaq on July 3rd. According to local industry sources, cryptocurrency ATM specialist Bitcoin Depot is set to list on the Nasdaq following the completion of its merger and acquisition (M&A) procedures with a Special Purpose Acquisition Company (SPAC).

ATM Business

Forecast of Cryptocurrency ATM Demand in Indonesia

Indonesia Ranks First Worldwide in Number of Cryptocurrency Holders

ATM Business

Model 1: Software Migration

Model 1 involves installing software on existing ATM machines in Indonesia to make them compatible with crypto deposit and withdrawal services.

This approach has the significant advantage of allowing our services to be offered much faster than physically installing new machines locally.

Additionally, this method generates profits through software maintenance and revenue sharing from software supply fees.

Advantages: Quick implementation time, rapid scalability potential.

Disadvantages: Time required for compatibility analysis with physical ATM machines.

Model 2: Supply of Crypto ATM Machines

Model 2 involves STANZabab and Kriptosh jointly developing and supplying a full range of Crypto ATM machines to Indonesian banks.

This approach requires time for equipment inspection and integration with the banking system. However, by providing the machines on a turnkey basis, it enables the generation of additional revenue. There are additional costs associated with transportation and installation at each location.

Advantages: Potential for additional revenue, ease of maintenance.

Disadvantages: Possible additional costs associated with the physical installation of ATMs.

STANZabab Milestone II - On/Offline Casino

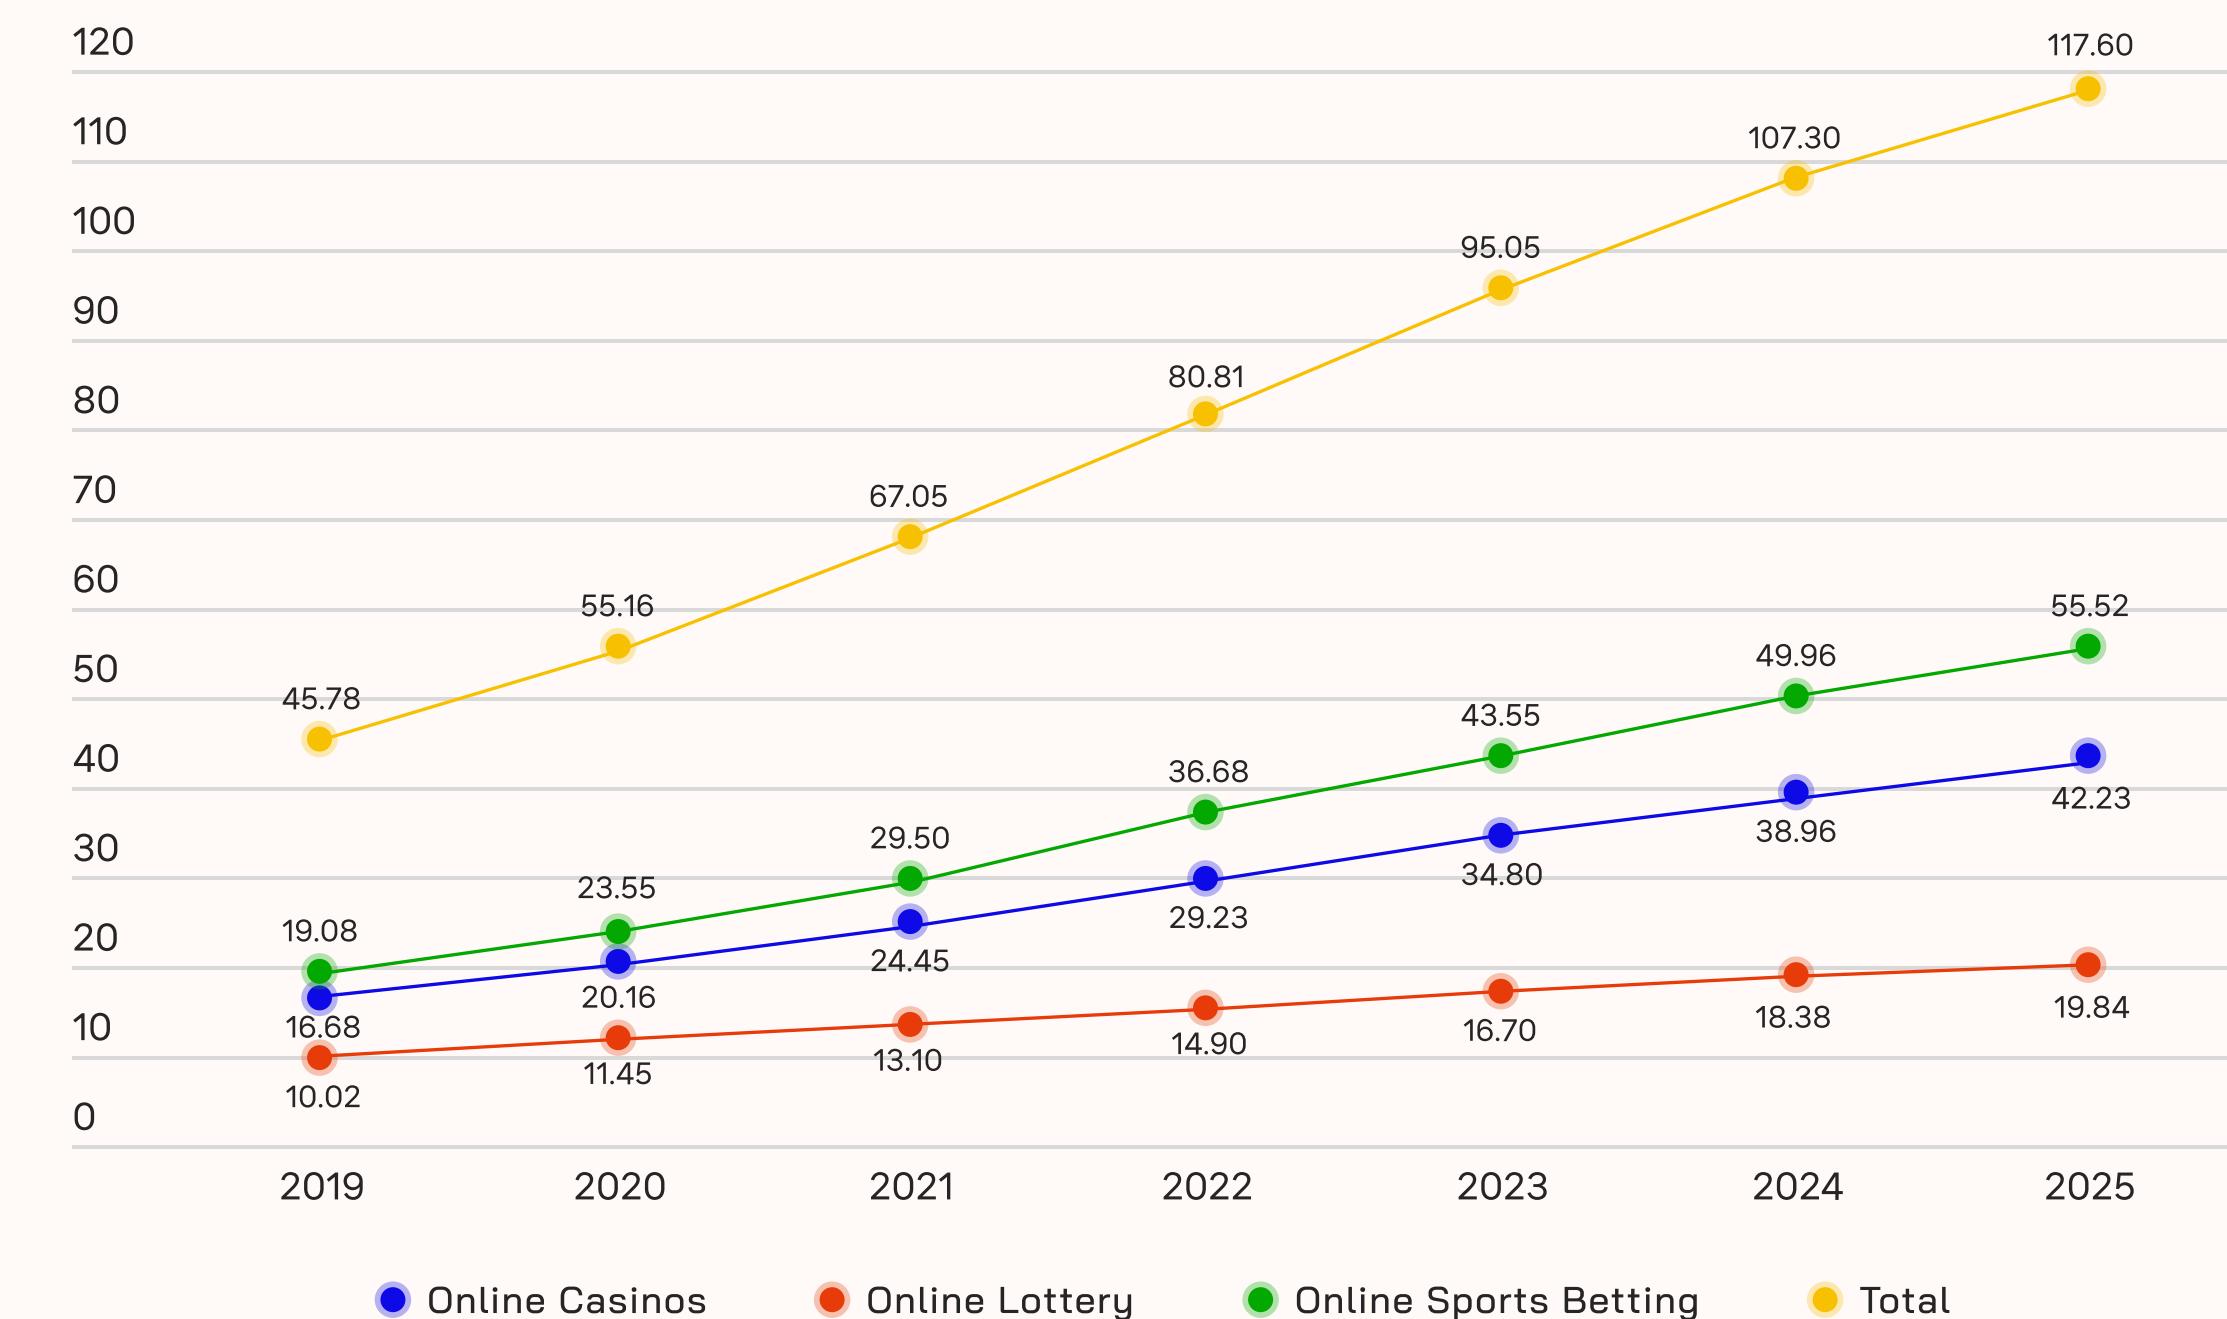

Online Casino

In 2023, the online casino industry has seen a growth that more than doubled over the past four years, registering over **176 million users and generating revenues exceeding 95 billion dollars.**

These figures are projected to climb in the next two years, with expectations that by 2025, the user base will **surge past 210 million, alongside an anticipated revenue of 117.6 billion dollars.**

| Online Casino

Online Casino Platform with MADE BY APES

STANZabab is currently providing online casino services in Asia, including Indonesia, and is preparing for a major update utilizing the renowned NFT, MADE BY APES.

Moving forward, we aim to differentiate from conventional online casinos through collaborations with globally recognized NFTs, and we are gearing up to aggressively market and attract not only users from Asia but also from around the world, leveraging strategic partnerships, including with the Kriptosh exchange.

STANZabab Milestone III - Credit Card

Credit Card

Through a partnership with a provider of Binance payment solutions,
we are launching Indonesia's first-ever payment gateway service along with a crypto debit Visa card, allowing for global withdrawals and payments.

Credit Card

Launching Crypto ATM, Loan & Custody services, along with a cryptocurrency-based credit card service utilizing all these infrastructures.

This card service allows for the real-time conversion of various types of digital assets (coins, tokens, points, mileage, etc.) into USDT, enabling all kinds of payment settlements through the global VISA network and the deposit and withdrawal of fiat currency via ATMs.

Additionally, the ABAB card's crypto conversion service will be made compatible with real-time payments through Apple Pay, Alipay, Google Pay, and WeChat Pay, enabling crypto payments with these services.

Hence, the service is applicable at over a million online stores, including but not limited to the Apple Store, Twitter, Amazon, Facebook, as well as Grab, ChatGPT, and others.

Regardless of location, from Indonesia to anywhere across the globe, you can withdraw your cryptocurrency as local currency through Crypto ATM machines.

Even if it's not a Crypto ATM, the card can be used at regular ATMs, allowing similar access to local currency.

Credit Card

Instantly swap crypto assets to IDR

Swap crypto assets for fiat currency in about one second.

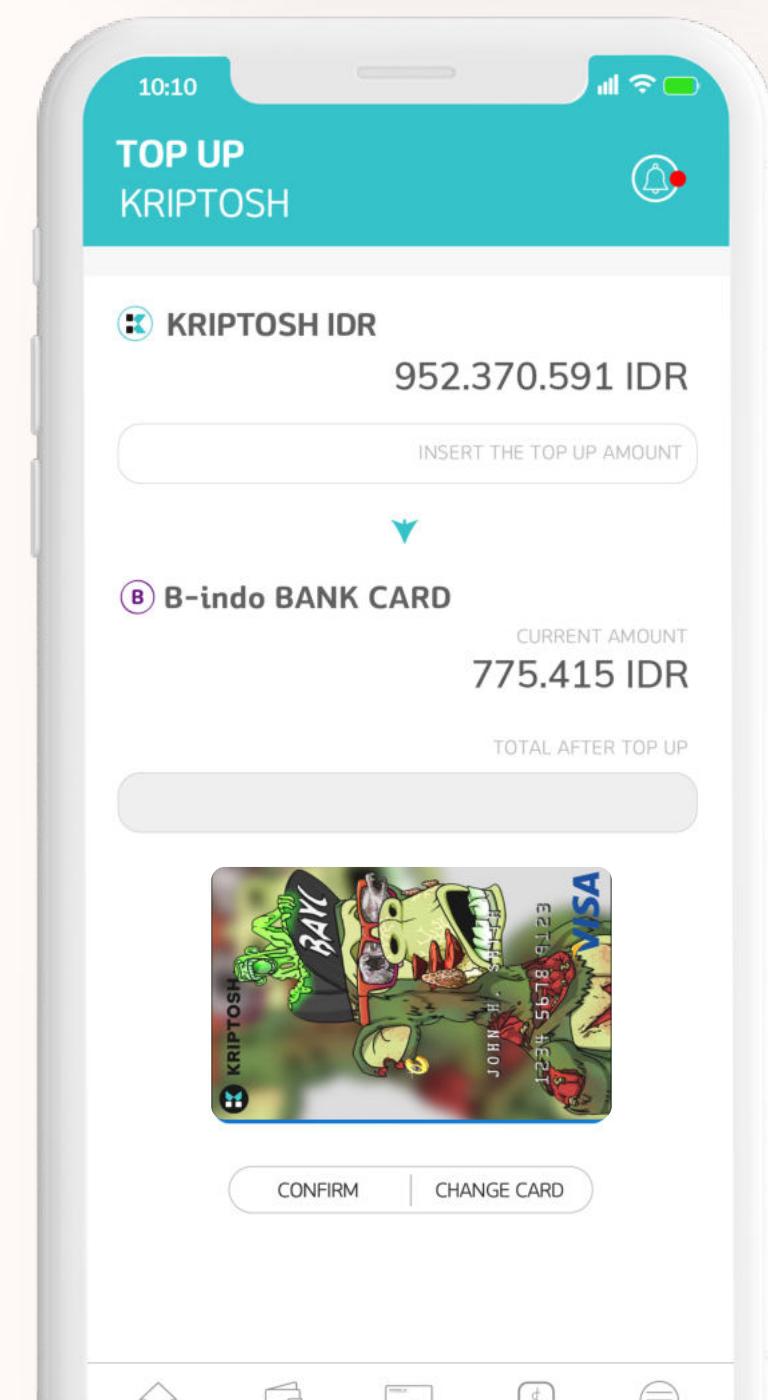

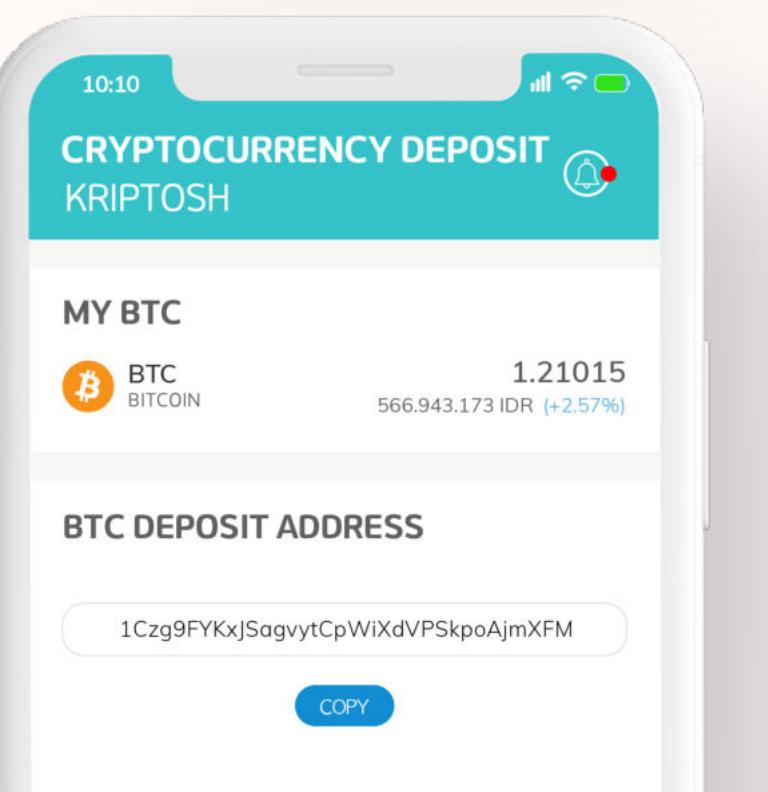

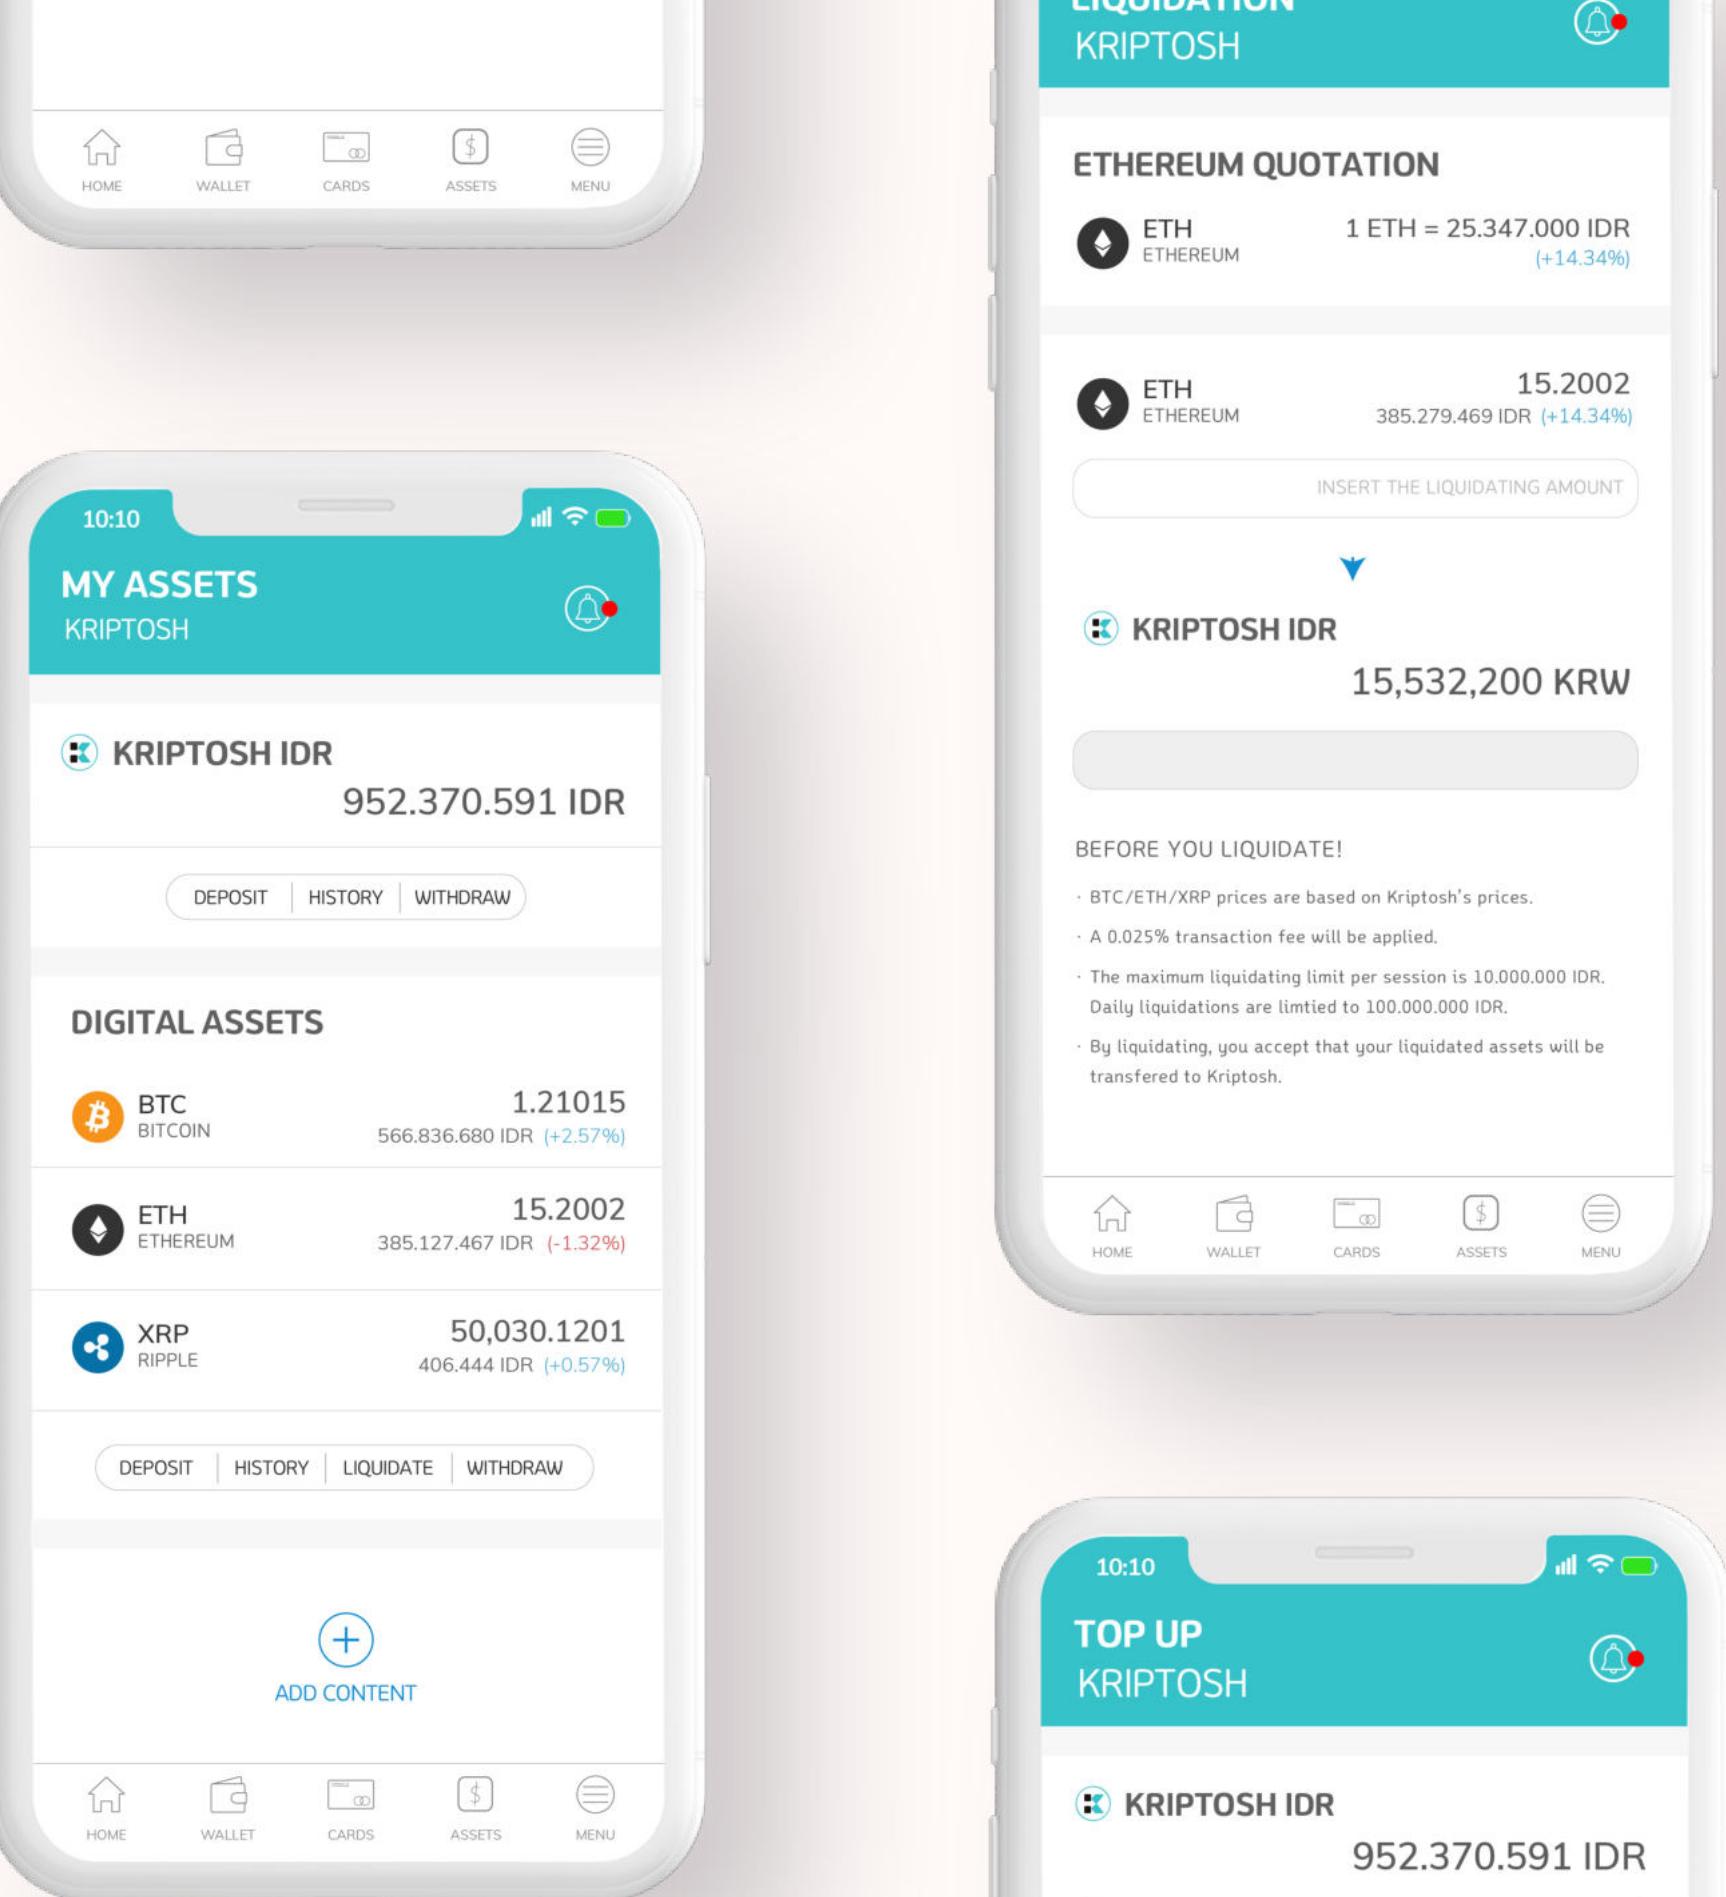

Immediate payment possible through bank card

The exchanged currency is immediately transferred to the owner's bank account and can be used directly with the credit card registered in the app.

All-in-One Open Banking System

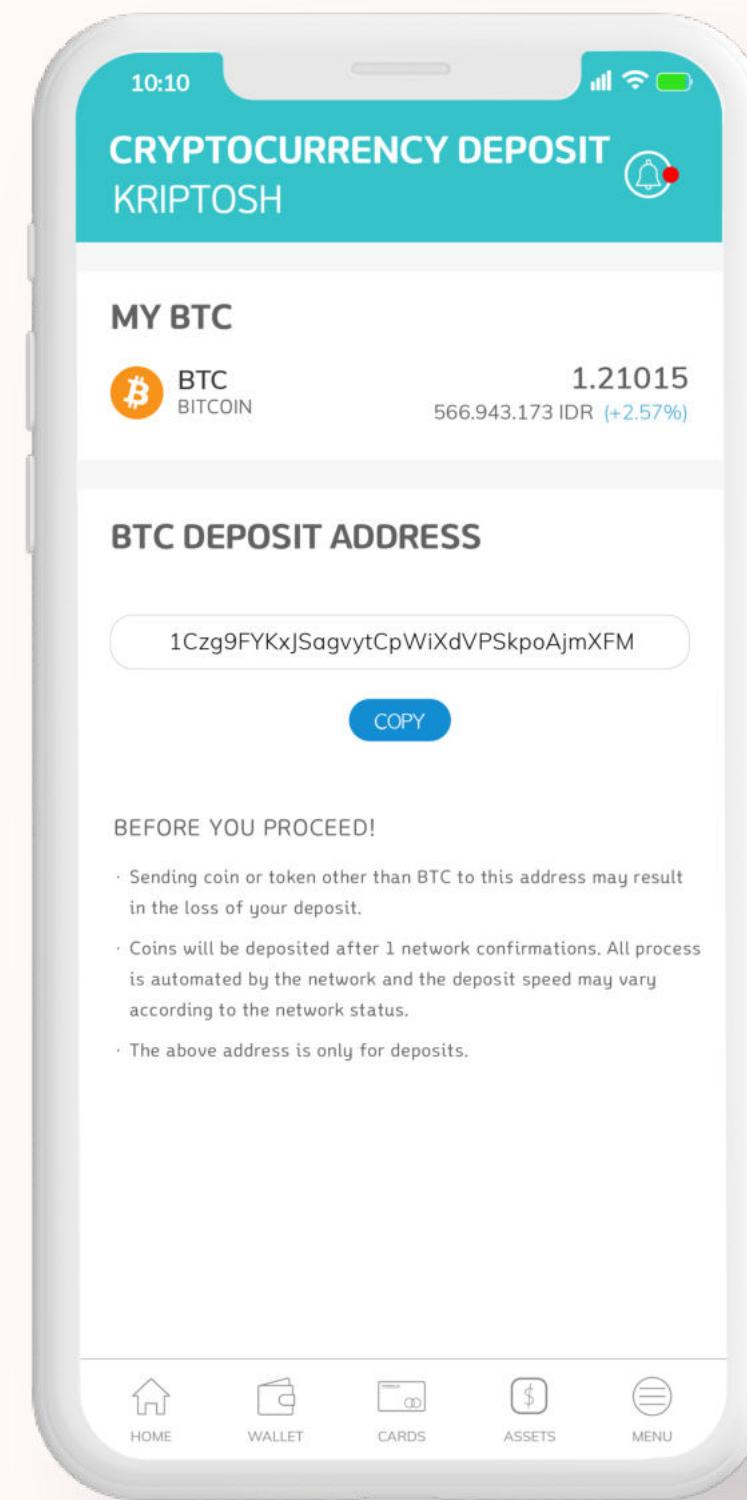

Manage all your crypto and fiat assets in one place with a single app.

Crypto Loan & Custody

Currently, INDODAX (the largest cryptocurrency exchange in Indonesia) offers staking services, but only operates a limited number of products. We aim to provide a deposit service that considers user convenience by offering a wider range of cryptocurrencies through the integration of Crypto ATMs.

| Crypto Loan & Custody

The main focus of STANZabab x Kriptosh's cryptocurrency lending, derivatives, and deposit services is to introduce the role of traditional banks into the cryptocurrency market.

Generally, the revenue structure for cryptocurrency pools, deposits, and derivatives has both similarities and differences compared to the structure of traditional banking markets.

1. In the case of loans, the annual interest provided by commercial banks is 3 to 5 times higher, and collateral is essential.
2. For deposit services, the interest rate paid varies according to the size of the assets deposited by the customer, but the interest rate is lower for major assets.
3. For derivatives, the interest rate paid is determined by evaluating the potential, market impact, and technological capability of the particular cryptocurrency project.

Through the cryptocurrency-related product services of STANZabab x Kriptosh, we will showcase what a digital bank should look like in the upcoming digital era. We are preparing a platform that can provide the best service based on STANZabab's fund expertise and Kriptosh's know-how in cryptocurrency.

Q&A

Q&A

Q1. How would you briefly describe STANZabab?

It is an investment platform for stable and high-yield asset growth. That is, all business models are officially approved and registered by the Indonesian government and financial authorities. Unlike recent unsustainable business modeling that relies on absurd commissions doomed to failure, it is an investment platform designed for investors who want actual stability and long-term reasonable returns.

Q2. How can the return on investment be calculated when investing solo without expansion?

Q3. If I were to invest, it seems like a certain number of people might follow. Can I know the expected return on investment in this case?

Please refer to pages 38 and 39 for examples of returns on investment when investing alone and when investing with acquaintances.

Q4. What are the reasons STANZabab guarantees a long-term and stable investment environment?

STANZabab operates under formal contracts and certifications with government agencies and banks, including Kriptosh registration with the Financial Services Authority, a contract with BCA (ranked number one bank), ABAB.TRADE (random number generation ensuring manipulation-free values) approved in Europe, a contract with 200,000 BCA ATMs in Indonesia for crypto deposits and withdrawals, and official approval for MLM. Therefore, the best measures are in place to protect investors.

Q5. How is it different from other similar marketing strategies?

I do not wish to compare with other Ponzi schemes. Ponzi schemes tempt people with high referral bonuses from the beginning to draw them in, but their end comes quickly. Our STANZabab operates within the bounds of legality, and we generate profits immediately through our already prepared platform and market market.

Q6. What is the source of the funds that provide a 300% return?

We have preparations for all the following businesses from a to d, ranging from initial fast-profit businesses (a, b) to medium-to-long-term businesses (c, d).

++ Please provide a brief explanation for each business model.

- a. Indonesian-based online casino Success case: Vietnam, Indonesia, Operating period: 5 years
- b. Binance-based chart game ABAB.TRADE Success case: Vietnam, Preparation period: 2 years
- c. Staking service Success case: USA, China, Operating period: 2 years
- d. Crypto ATM + cryptocurrency exchange Success case: NASDAQ-listed, Preparation period: 4 years

Q7. How do I sign up?

Q7. You can sign up using a referral code.

Q8. Is there a channel where I can receive investment guidance?

Investment guidance, various announcements, and Q&A sessions are conducted through our Telegram channel.
